Chengdu, Sichuan, China

EDUCATION

Northwest Normal University

Lanzhou, China

Master of Management in Tourism Management | GPA: 3.6/4.0

09/2023 – 06/2026

Beijing University of Posts and Telecommunications(Century College)

Beijing, China

Bachelor of Management in E-commerce

09/2014 – 06/2018

RESEARCH PROFILE

- Research at the intersection of human geography, tourism geography, digital economy, and ecosystem services.
- Apply GIS-based spatial analysis and quantitative modelling to examine ecosystem services assessment and planning in changing landscapes, tourism-ecology interactions, and digital economy-driven cultural-tourism integration and coordinated urban-rural development.
- Aim to support regional sustainability, sustainable land-use planning, and nature-based climate adaptation.

RESEARCH INTERESTS_____

- **Ecosystem services assessment and planning in changing landscapes**, with attention to trade-offs and synergies among ecological, cultural, and socio-economic values.
- **GIS-based spatial analysis of tourism-ecology interactions and regional sustainability**, linking tourism development, ecosystem service values, landscape patterns, and planning decision-making.
- **Digital economy-driven cultural-tourism integration and urban-rural coordination**, focusing on spatiotemporal evolution, regional disparities, coupling mechanisms, and influencing factors.
- **Nature-based climate adaptation and sustainable land-use planning**, connecting environmental quality, human well-being, and regional planning in rapidly changing landscapes.

RESEARCH EXPERIENCE_____

Spatiotemporal Differentiation and Trade-off Synergy Mechanism of Ecosystem Services in Qilian Mountain National Park

Principal Investigator | Gansu Provincial Graduate Research Grant Project (2024-2025)

- Research results provided scientific basis for sustainable ecological management of national parks and were successfully published upon project completion.

Digital Technology Integration in Suburban Rural Tourism Destinations

Research Team Member | National Natural Science Foundation of China (Project No. 42401375) (2024-2026)

- Provided empirical evidence for understanding digital technology-driven rural tourism transformation.

Spatiotemporal Characteristics and Influencing Factors of Digital Economy and Cultural-Tourism Industry Integration

Research Team Member | Xinjiang Institute of Education (Project No. XJJY202421) (2025-2026)

- Contributed to modeling regional disparities and driving factors of digital economy–cultural tourism integration using coupling coordination and Dagum Gini decomposition methods.

Tourism Resource Survey of Jingning County, Pingliang City, Gansu Province

Research Assistant | Provincial Government Project (2024)

- Conducted field surveys of tourism resources in Jingning County; produced resource distribution maps; proposed strategic recommendations for sustainable tourism development.

Domestic Tourism Market Survey for Gansu Province (Tianshui City)

Research Assistant | Provincial Tourism Administration (2024)

- Identified key segments and tourism trends; and provided evidence-based support for tourism development in Gansu Province.

ACADEMIC ACTIVITIES

Geographical Society of China Annual Meeting of the Tourism Geography Committee 07/2024

- Delivered an oral presentation on ecosystem services research

Tourism Tribune China Tourism Research Annual Conference 10/2025

- Presented a research poster on tourism-ecosystem interactions

SKILLS & AWARDS

- **Modeling & GIS:** InVEST, FRAGSTATS, ArcGIS Pro, ENVI, Landsat, GTWR/IGTWR
- **Statistics & Programming:** R (BRT, SOM, Bayesian hierarchical models, GWR), MATLAB, Python
- **Visualization & Data:** Adobe Illustrator, Origin
- **Awards:** National Graduate Scholarship, Ministry of Education, China 2025
- **Language:** English (IELTS scheduled for August 2026)
